

## PINLESS WELLHEAD SYSTEM

Canary, LLC's Pinless Wellhead System contain all the retainment components of a wellhead internally. This containment reduces potential pathways for leaks, improves personnel safety, and increases protection of the environment. With the Pinless Wellhead System, there is neither the capability nor the need to adjust the locking mechanism from outside of the wellhead.

### FEATURES

- Capable of handling pressure of up to 15M PSI and temperatures of -20 to 250F
- Customization available for temperatures reaching 350F
- Available in 5M, 10M, and 15M pressure ratings, and sizes 11" and 13"
- Manufactured under API 6A standards

### BENEFITS

- Decreases potential for leaks
- Improves wellhead security because there are no pins to tamper with
- Saves non-production rig time
- Reduces potential for human error
- Improves overall safety of personnel
- Offers increased environmental protection
